Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4 drawn to a method of fabricating a liquid crystal display (LCD), wherein the method has the step of forming at least one or more scribe cracks on each side of substrates, classified in class 65, subclass 433.
 - II. Claims 5-11 drawn to an LCD having substrates, classified in class 349, subclass 158.
2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the LCD as claimed in group II can be made by another and materially different process other than the claimed method in group I (e.g., process as shown in prior art, figures 2A-2F).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
